This label is not a statutory requirement. It is a voluntary label provided as a customer service to allow consumers to make informed decisions on the energy performance of competing products.

Floored it at the Self Build Exhibit

*Euro*sash was the star of the show at the Kings Hall in February as the exhibit stand took on a new upbeat look.

The windows on display included the new 'A' rated PVC U sash window and the fully integrated fly screen which proved to be most popular.

Galway sees the *Euro*sash next at the Self Build exhibit on the 15th May, for more details contact the sales team today.

Happy Easter!

Eurosash Cream on Cream is here at last!!!

As part of our on-going product development we are pleased to announce that our cream grained **eurosash** is now available on a cream base. All cream grained windows produced to date have been foiled on a white base, resulting in a 'little bit of white' being visible inside the balance chamber of the outer frame. The new cream based outer frame is coloured throughout so the inside of the balance chambers are now cream.

The new cream base outer frame with cream foiling to give a timber-like appearance looks fantastic, and it gives **eurosash** yet another distinct selling advantage over its competitors. The new profiles are in stock and are now being used as standard.

Eurosash Balance Fixing

A new Brass insert has been manufactured to increase the strength to the fixing of the Caldwell Balance.

After careful consideration we decided to make the insert from brass to ensure that no rusting problems would occur.

This is now fitted as standard at no extra charge. Once again **eurosash** pass on the improvements without the added cost.

No Delay we're on our way

Eurosash are please to announce that a new Iveco lorry has now joined the existing fleet increasing our delivery capabilities.
